# EURO²

EUROCC
National Competence Centres in the framework of EuroHPC Phase 2

The mission of EuroCC 2 is to continue the establishment of a network of National Centres of Competence (NCC) in the most efficient way, while continuing to address the differences in the maturity of HPC deployment in Europe, for which improvement has already been noted. Therefore, in addition to high-level management to monitor progress in the NCCs' development, the main task of the overall activity is to support national centres in setting up their individual operational frameworks, while accessing and making the most of the experience and expertise currently available at national and European level. To support this, EuroCC 2 will work closely with CASTIEL 2, which is tailored to the needs of the EuroCC2 NCCs and this time will also involve the Centres of Excellence.
Who is on board?

The EuroCC activities, with 32 member and associated countries on board, are coordinated by the High Performance Computing Centre Stuttgart (HLRS). The project aims to elevate the participating countries to a common high level in the fields of HPC, HPDA and artificial intelligence (AI).

The EuroCC project has established National Competence Centres (NCCs) in the participating countries, which will be responsible for surveying and documenting the core HPC, HPDA, and AI activities and competencies in their respective countries. Ultimately, the goal is to make HPC available to different users from science, industry, public administration, and society.
